

# Angular Software Engineer

## Job description

You will start as an Angular Software Engineer and join an Agile team of 4 to develop products and tools based on innovative technologies.

As part of the R&D team of a small but fast-growing company, you will have the opportunity to work on all parts of the Amoobi software stack, and be involved in all aspects from the planning to the delivery.

We pride ourselves on our innovation and our ability to move quickly. You will be able to bring your creativity and new ideas to contribute to our development. You will be part of Amoobi's growth and have the chance to shape the direction of the company.

## Required skills & qualifications

- Bachelor's/Master's degree in Computer Science, Software Engineering, or a related field
- **2-5 years** of experience with **Angular development**

## You might be a good fit if you

- Have some experience with **Python 3** and feel comfortable with it
- Have a **curious mindset** and are eager to learn about new things
- Are a **team player** and enjoy working in close collaboration with your colleagues
- Are able to communicate in English (French is a plus)
- Enjoy keeping up to date with the latest technologies

## Strong candidates may also feature some of the following

- Experience in UX design
- Participation in personal or open-source projects
- Experience with machine learning (any framework)
- Practical knowledge of SQL (MySQL, PostgreSQL...)
- Practical knowledge of Linux, shell scripting, networking, Docker

## Representative projects

- Adding a new feature to the web application used by our clients
- Implementing an internal tool using Python to facilitate the work of other teams
- Developing a new UI for an internal tool or a new client dashboard

## About Amoobi

### What we do

Amoobi is an innovative and fast-growing scale-up. We have built a unique technology that uses 3D optical sensors to automatically track and measure the customer journey through retail stores. Using these sensors, we can derive insights and recommendations for store optimization. Our vision is to become the market leader in retail space analytics, and help retailers and brands make their store space easier, more efficient, and more enjoyable for customers to shop. This improves customer experience and overall sales. In a world where physical retail is challenged by e-commerce, we are bringing an innovative way of measuring and improving the customer experience in-store.

### Who we are

Amoobi is a start-up of 15 employees from various backgrounds. You will be joining the R&D, a team of 4, where the day-to-day language is French. While most of the employees are French speakers, all the official documentation & meetings take place in English, so you should be able to understand and communicate easily. Amoobi values its culture, and your fit with it is a key criteria for joining the team. Our 5 values are the following:

- Quality
- Commitment
- Honesty
- Team work
- Fun

### How do we differentiate ourselves from other companies?

First, we are a small team, so you will know and be able to speak with everybody. Not only does this create an enjoyable atmosphere at work, it also means that your colleagues will always be ready to help you out in the best possible way. As fun is one of our core values, we regularly enjoy lunch activities (both cultural and sportive) and afterworks. You will be welcome to suggest and organize your own activities if this is something you like. We start every day by spending time all together at the coffee corner, to discuss everything but work, and also have lunch together. Finally, we are open-minded and always willing to improve ourselves, so never fear expressing your ideas, we will be listening to you.

Are you interested in joining our team? Please send us your resumé as well as a short note about yourself and why you think you are fit for this job at [jobs@amoobi.com](mailto:jobs@amoobi.com). We are looking forward to meeting you!
